Education

Vellore Institute of Technology

- GPA: 8.86/10.0

Aug 2023 – May 2027

Internship Experience

amasQIS.ai

May 2025 – Oct 2025

Full Stack Intern

- Worked on scalable systems with focus on performance optimization and efficient data handling.
- Interpreted and modified existing Python codebases to improve feature performance.
- Analyzed system behavior and user data to identify patterns and improve system efficiency.
- Applied structured problem-solving and debugging techniques across modules.

Projects

Fourier Neural Signal Predictor (Mini Project)

- Implemented Fourier Transform-based feature extraction for time-series signal prediction.
- Built a neural network model in Python to learn frequency-domain patterns.
- Improved prediction accuracy by leveraging signal decomposition techniques.
- Demonstrated understanding of mathematical modeling behind neural networks.

Graph-Based Recommendation Engine

- Modeled user-content relationships using graph structures.
- Simulated Graph Neural Network concepts for recommendation improvement.
- Enhanced relevance through neighborhood-based propagation techniques.

UniVibe

- Built a peer-to-peer platform with matching logic based on user preferences.
- Analyzed interaction data to optimize user engagement.

Social

- Developed a real-time content-sharing platform using Firebase.
- Implemented scalable backend and user profile systems.

Leadership and Extracurricular

National Service Scheme (NSS), VIT Bhopal

- Led initiatives by identifying problems and structuring solutions.
- Coordinated teams and improved execution through feedback analysis.

Pahadi Club, VIT Bhopal

- Organized events and improved participation using data-driven insights.

Skills

Technical: Python, MySQL, Pandas, NumPy, Firebase

Machine Learning: Artificial Neural Networks, Basics of Graph Neural Networks, Fourier Transform Concepts

Core Strengths: Problem Solving, Mathematical Reasoning, Data Analysis, Code Interpretation
